

PET-Xi Functional Skills

We are proud to be supporting the training and education sector, working with a number of Training Providers and Colleges, providing them with an intensive, flexible and cost effective Functional Skills solution.

Let the experts help

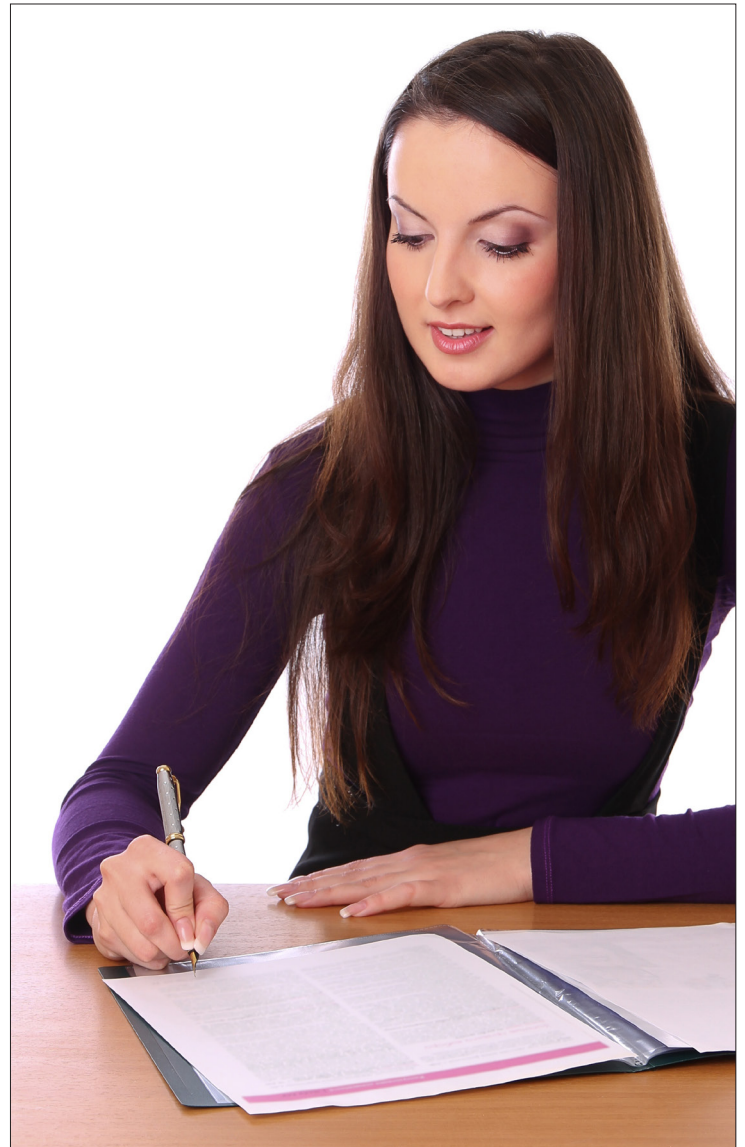

We are Functional Skills experts! We have over 23 years' experience of delivering English, Maths and ICT qualifications. We have a curriculum team paired with a highly experienced specialist training team to call upon, which means that we can deliver quality training, consultancy and assessment tailored to the needs of individuals and companies.

Using a blended learning approach, we pride ourselves on being responsive to employer/provider needs and recognising time and budget constraints. We use the PET-Xi classroom dynamic approach in all our training, allowing us to showcase achievement rates of over 95% nationwide!

No one delivers it better

Whether it's large global organisations or local SME's, PET-Xi works collaboratively with all its partners to ensure we deliver our unique dynamic approach to Functional Skills in all our training sessions. We deliver to over 20,000 people and understand the impact Functional Skills can have on a workforce, from greater productivity to enhanced CPD.

There have been reports and stories about employers who are concerned about their workers lack of Functional Skills, particularly in language, communication and numeracy. We can help support Apprenticeship delivery by increasing your productivity and efficiency whilst improving your profile with your Employer Partners.
